862 Cadieux St., Montreal.

Sept. 17, 1914.

Dr. R. H. Falconer,

President,

The University of Toronto,

Toronto, Ont.,

Sir,

I desire to ask whether there are any vacancies on the staff of the Mechanical Engineering Department of the University.

I hold the degree ~~sof~~ M.A. and M. Sc. from McGill University and have just received the degree of S. M. from The Massachusetts Institute of Technology, Boston, after a year of advanced study. Up to a year ago I had been for five years Professor of Mechanical Engineering and Lecturer in Mathematics at McGill University College, Vancouver. I have had practical experience with the John McDougall Caledonian Iron Works Co., Montreal, Allis-Chalmers-Bullock, Ltd., Montreal, and the Western Canada Power Co., Vancouver. Before taking up Engineering I had also several years' experience teaching school.

I shall be glad to hear of any opening in my line of work.

Yours truly,

Al Walter Inunn

D. Walter Munn, Esq.,
862 Cadieux Street,
Montreal.

Dear Sir:

I have your letter of September 17 inquiring as to whether there are vacancies in the Mechanical Engineering staff of the University. I have shown it to our Professor of Mechanical Engineering, but he informs me that there is no prospect of any vacancy in that department this year. I shall be glad, however, to keep your letter beside me in case I hear of anything suitable.

Yours sincerely,

President.
